He went to Chengo and stayed the a short time, and as soon as he heard the news of the tare of New-Orleans by our forces, he immediately started that place, and, on his way, stopped at Amsterdam, and in ablic speech there, related the whole history of his expulsion a the city, giving the State out of the Union. e stopped here a few days to see his friends and to visit grave of his first wife, whom he buried here while a resit of this place, and then he went direct to New-Orleans, has ever remained there went direct to New-Orleans.

The Grand Division of Sens of Temperance comes next in importance, so far as numbers are concerned. It has 20 sub-Divisions in this city alone, comprising some 5,000 members. There have been over 2,000 new members added within the last three months, in enatera New-York, and the city Divisions are rapidly increasing. The Hon. A. H. Dailey, of Kings County, was elected President. This Society is fast gaining to strength.

THE OPENING, OR PRINCIPAL DAY, OP THE MARKET. It Monday, Aug. 13.—The cattle trade since last I market has been something like this: More than 3.000 head were received at the Hudson City yards, about 2.250 of which were sold to butchers at very nearly the figures last quoted. Then came the wholesale trade at Albany, Saturday, where they had 2.700 bullocks for the week, and buyers asked and obtained a concession of very hearly jc. \$P\$ in the weight from the preceding week. The best drove, a very fine one, was longly for the Brighton market at \$9.70 per cwt. gross; good fair steers at \$6.262, and \$6.00 was to \$jc. for very round. These prices prepared the way for a decline at Ope-hundredth st. and the northeast rain storm of to-day helped the thing along. It is possible that last week's prices might have been obtained in a fine clear day, but with the very unfavorable weather, and a total of about 6.400 beeves for the week, a large proportion of them very good Kentucky and Ohio grade Durbams, a decline of jc. is noted, but the really superior quality of so many droves keeps the figures closes up to those in last report. Several of these fat droves brought 17c. right through, while at least one good Ohio drove of 7; ewt. steers was wholesaled at \$125 each to a broker, who appeared to be making a commission on them at retail. The cattle were not so exclusively in the hands of speculators as for some weeks past, still numerous droves changed hands from one to three times before they were retailed. A very few of the pick of best droves were sold at 18c, but instances were rare in which butchers were willing to pay over 17jc, for tip-to-post and the storm is evidently nearly over. No fresh cattle have come in, but nearly 200 head were left hast night, and there are next to no hovers for these. It requires considerable in ducement for butchers to go so far two days in succession, when they know that cattle can be ha

MILCH COWS—The light receipt this week prove more than are wanted, and dealers call the decline \$10 per head from last week. Two or three causes combine both to reduce the prices and fejure sales. One is cool weather, in which milk does not sell as well; hence farmers and milkmen do not want fresh cows to produce it. The decline in beef also in jures the cow trade by lessening the value of dry animals they are to take the place of. One other cause of daliness is a renewal of the order for city milkmen to move or reduce the number of cows; and having less confidence than formerly in the potency of injunctions, they are not anxious to add to their

number of cows; and having less confidence than farmerly in the potency of injunctions, they are not anxious to add to their stock. Many unsold cows were in the pens to day, and it was a difficult ratter to get \$100 for fine cows. Most of what are termed good milkers bring \$25.5895, with fair cows at \$60, and thin, small animals at \$50.260.

VEAL CALVES—There is no charge to note in the calf trade. Receipts are light, but the stock is mostly good. A few grass culves are coming in and bring \$25.915 and Fair veals sell at 10.210, good fat culves at 120, but only when selected. It will take a pen of pretty good culves to bring the sold together.
